Fire distress sale. No interior access allowed for safety reasons until under contract with documents signed, but key is available to view interior of shed. Value is in the land, driveway, pool, fenced cleared lot, shed and the fact that impact fees have been paid. There are sprinklers plus an irrigation well that were working prior to the fire, which might still work, nothing is warranted. Great opportunity for a contractor to restore this once beautiful home back to it's former glory!
